TEU

FD Series 45-50 Counter Balanced Forklift

Three Features

1 High safety factor

Compared with the similar forklift its balance weight increases more than 300kg, the stability and overloading are improved much.

2 Powerful brake

Strong and effective power brake system provides the most reliable security. Optimum design and priority system ensure the brake, as well keep the power distribution of othersystems, which makes operation more comfortable.

3 High strength mast

High strength-solder bath mast is forklift's strongest arm. Wide filed of front vision ensures the safety of operation and improves work efficiency.

Notes:

Vertical axis represents load capacity; Horizontal axis shows load center, Load center are determined from front face of the fork. Capacity based on a 1000mm cube load configuration with the center of gravity at the true center of the cube, and standard fork. The load capacity will be reduced while the mast tilt forward or loading with long fork or lifting transformable width of goods. Getting the load capacities at the various load centers timely via the load curve.
